This work is dedicated to my grandfather,  
Felix Liebst,  
who passed away during this research.

## Acknowledgements

*“Sports create a bond between contemporaries that lasts a lifetime.”*

Bob Cousy

Sports have been an essential part of all stages of my life. As an athlete (football, volleyball, track and field, swimming, chess, scuba-diving, and kitesurfing), as a football referee, and as a trainer during a voluntary social year in sports, I got in touch with many fascinating people. My time at the Wissenschaftliche Hochschule für Unternehmensführung (WHU) – Otto Beisheim School of Management, more specifically the Center for Sports and Management (CSM) marks no exception. My doctoral studies were full of inspiring discussions and problem-solving sessions, rememberable events but also challenges of different kinds. The following persons made my time at the university worthwhile and, thus, deserve my deepest gratitude:

- My first supervisor Prof. Dr. Sascha L. Schmidt for his coaching and mentorship. Your valuable feedback significantly contributed to my research results but also to my personal growth.
- My second supervisor Prof. Dr. Christoph Hienert for his guidance regarding the classification of my research. Thank you for inspiring me to always reach for the stars.
- Jun.-Prof. Dr. Dominik Schreyer for challenging problem-solving sessions, honest assessments of research ideas, and diverting team meetings.
- Dr. Linus Wunderlich for his valuable input as a co-author and for providing fun facts on the Olympic Games.
- My fellow doctoral students Sebastian Koppers, Harry Krüger, Nicolas Frevel, Daniel Beiderbeck, Johannes Fühner, Sebastian Flegr, Alexandra Büchling, David Damjakob, Dominik Geissler, Vera Schweitzer, Lukas Lanz, Caroline Amberger, Nicolas Baecker, and Josef Welzmüller for profound conversations, energetic sportive competitions, and virtual coffee breaks. Without you my doctoral studies would not have been complete.
- The AHEAD project team around Dr. Daniel Högele, Lukas Grether, Patrick Keil, Lena Hoof, Gilles Eckhard, and all other colleagues I worked

with during my time at FC Bayern Munich. It was an honour to shape the future of one of the greatest football clubs in the world.

- The CSM staff Kerstin Forword and Maria Dahl for a great start in Düsseldorf despite the COVID-19 pandemic. Thanks for always having an open ear for my questions.
- All other colleagues and students, I had the opportunity to work with as part of the teaching modules offered by the CSM and the Sports Business Academy (SPOAC).
- My friends and family (particularly my parents, sister, grandmother, aunt and uncle) for unconditional support in times where physical get-togethers were largely limited. You always believed in me and encouraged me to pursue my dreams. I hope I could return the same positive attitude I received from you.
- Finally, my girlfriend Thaiza Alvarenga Pinto for sharing unforgettable moments, lifting me up in difficult situations and always putting a big smile on my face. I am looking forward to every single moment together with you, that is still to come.

To everyone who is mentioned here – explicitly or implicitly: Writing this dissertation would not have been possible without you. Thank you for enriching this great chapter of my life!

Christoph Schlembach
