Establishing a best practice model of supplier relationship management (SRM) for multinational manufacturing companies in the European transportation industry
Establishing a best practice model of supplier relationship management (SRM) for multinational manufacturing companies in the European transportation industry
# Table of contents

List of tables and figures ................................................................. XI
List of appendices ................................................................. XV
List of abbreviations and acronyms ........................................ XVI
Abstract ........................................................................ XVIII
Synopsis ................................................................................. XIX

1. SRM in the European transportation industry ..................... 1
   1.1 Introduction .................................................................. 1
   1.2 Bombardier and the European transportation industry .. 4
   1.3 SRM in the context of global and complex supply networks .. 7

2. Scope of research and definition of terms.............................. 11
   2.1 Definition of terms and limitations .............................. 11
   2.2 Research sequence of this thesis ................................. 13
   2.3 Proactive measures versus reactive measures in SRM .... 15

3. Ontological viewpoint and reflective professional practice ...... 18
   3.1 Ontological viewpoint .................................................. 18
   3.2 Why research on SRM and supply networks ................. 20
   3.3. Action Learning Set (ALS): start of the research journey .. 24
   3.4 Personal development during time ................................ 27
   3.5. Reflective professional development: the past .............. 30
   3.5.1 Work-related issues and philosophical viewpoints .... 30
   3.5.2 Influence on research topic ...................................... 33
   3.6. Reflective professional development: the present ......... 37
   3.6.1 Influential people regarding thesis and viewpoint ..... 37
   3.6.2. Influence on research topic: Why use a case study approach? 42
   3.7 Reflective professional development: the future .......... 44
3.8. Philosophical stance: from a positivist to a pragmatic interpretivist............. 47
3.8.1 Why a pragmatic interpretivist’s position................................................. 47
3.8.2 Competencies and skills ............................................................................. 50

4. Research methodology, methods and research plan...................................... 52
4.1 Purpose and objectives................................................................................ 52
4.2 Research Phase I – IV: multiple and qualitative approach ......................... 56
4.3 Schedule and systematic approach.............................................................. 59
4.4 How the case study approach adds value to this paper.............................. 64

5. Phase I: Confirmation, disconfirmation and refinement............................... 68
5.1 Research questions and approach in Phase I............................................. 68
5.2 Ethical considerations.................................................................................. 70
5.3 Objectives of research questions.................................................................. 72
5.4. Interviews for research question validation and amendment.................... 77
5.4.1 Interview one: Senior Manager A......................................................... 77
5.4.2 Interview two: Senior Manager B.......................................................... 81
5.4.3 Interview three: Senior Manager C........................................................ 83
5.4.4 Interview four: Senior Manager D.......................................................... 87
5.4.5 Interview five: Senior Manager E.......................................................... 90
5.5 Summary of interviews and refinement of research questions................. 93

6. Phase II: Identifying best practices in SRM.................................................. 99
6.1 Systematic literature review and semi-structured interviews .................. 99
6.2 Conducting a systematic literature review............................................... 101
6.2.1 Motivation for conducting a systematic literature review ................... 101
6.2.2 Creating an expert panel for validating literature review .................... 101
6.2.3 Search strategy for systematic literature review................................... 108
6.2.4 Search terms, inclusion and exclusion criteria..................................... 109
6.2.5 Execution process and results of literature review ........................................ 113
6.2.6 Discussion and summary of papers................................................................. 115
6.2.6.1 General findings and meta-synthesis ......................................................... 115
6.2.6.2 Schools of thought in SRM and supply networks (I) ................................. 118
6.2.6.3 Causal factors for supply disruptions (II) .................................................. 123
6.2.6.4 Anticipation, prevention and management of supply disruptions (III) .... 128
6.2.6.5 Best practices in SRM (IV) ....................................................................... 131
6.2.6.6 Specific questions on SRM (1-10) .............................................................. 134
6.2.6.7 Findings of the systematic literature review .............................................. 147
6.3 Semi-structured interviews ............................................................................. 153
6.3.1 Preparation of interviews ............................................................................ 153
6.3.2 Motivation for conducting semi-structured interviews............................... 157
6.4 Semi-structured interviews: listing of categories in best practices ............... 158
6.4.1 Results and findings of semi-structured interviews ..................................... 158
6.4.2 Schools of thought in SRM (I) .................................................................... 161
6.4.3 Causal factors for supply disruptions (II) ..................................................... 165
6.4.4 Anticipation, prevention and management of supply disruptions (III) .... 169
6.4.5 Best practices in SRM (IV) ....................................................................... 174
6.4.6 Specific questions on SRM (1-10) .............................................................. 181
6.5 Conclusion of systematic literature review and interviews .......................... 199

7. Phase III: Confirmation and disconfirmation of best practices ..................... 204
7.1 Purpose of case study approach: Supplier V and Supplier J case ............... 204
7.2 The Supplier V case: a Chinese supplier to Bombardier Hennigsdorf .......... 210
7.3 The Supplier J case: a Scandinavian supplier to Bombardier Görlitz ......... 221
7.4 Summary of case studies and refining best practice elements .................. 235

8. Phase IV: Refining best practices in SRM ..................................................... 238
8.1 Establishment of SRM best practice model ................................................... 238
8.2 Limitations to the best practice model and framework.......................... 253

9. Conclusion and recommendations .......................................................... 255
9.1 Closing the gap in research and developing a best SRM tice model ....... 255
9.2 Personal professional reflection and future research .............................. 262

Terms of reference ..................................................................................... 265

Appendix 1: Supply disruptions from 2000-2012 ........................................ 275
Appendix 2: List of articles published in magazines and journals.............. 276
Appendix 3: Results of Phase I interviews .................................................... 277
Appendix 4: Phase I question list for research questions validation............ 278
Appendix 5: Phase II question list after adjustment of research questions ..... 279
Appendix 6: Bombardier Procurement guide 2011 ..................................... 280
Appendix 7: Case study questions in Phase III .......................................... 281
Appendix 8: Patterns matching results from Supplier V case in Phase III ..... 282
Appendix 9: Patterns matching results from Supplier J case in Phase III ...... 283
Appendix 10: Patterns matching summary ................................................... 284
Appendix 11: Best practice model in SRM ............................................... 285
Appendix 12: Phase I: Extract from question list from candidate 1 .......... 286
Appendix 13: Article extract from SCM Magazine ..................................... 287
Appendix 14: Supplier evaluation (COMPANY 9) ..................................... 288
Appendix 15: Summary of interviews from Phase II (I-IV) ...................... 289
Appendix 16: Summary of interviews from Phase II (1.-10.) .................... 290
Appendix 17: Case study approach and sequence .................................... 291
Appendix 18: Best practice elements in SRM ........................................... 292
Appendix 19: Phase II: Extract from question list from candidate 6 ......... 293
